**All software is available on subscription
 Software for school use with free upgrades over three years!**

"I really liked the JellyJames software. I've been trying it out with the children in my class and its great. It means that instead of testing them on a one-one basis, they can work at their own pace. I think you've really got something here - a programme that allows children to keep a record of their improvements and at the same time get statistical information in the form of bar graph which they can understand. The best test of any software is to give it to the children and if after a week, they still want to use it then it rates as a success. They still want to use it!"

Jonathan Paine AST Rustington Primary School

| Optional: Installation / day | £250.00 | <input type="checkbox"/> | | |

* No. of pupils enrolled at the school and **not** users who will use the software concurrently.

Network software for the ICT Suite and one single CD will be supplied for school use.
 Additional CD's will be charged @ £10.00 per CD.

"Number Bonds has good graphics, colouring, calm air. The ticks are instant (which, as with the other software is very helpful). Because of the progressive nature of this programme and the logical presentation of 'add 1' or 'add 10' etc.is very helpful to me. The language is always encouraging and motivating."

Pam Dobson. SpLD Teacher, Potters Bar. Herts
